### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance:

The subject matter of the independent claims could either not be found or was not suggested in the prior art of record. The subject matter not found was Claims 18 and 21 each recite a syringe comprising an outer tube, a gasket slidable in the outer tube, and a pusher inserted through an opening of a base end of the outer tube and operable for moving the gasket. A stopper is disposed on the pusher to be slidable along the longitudinal direction of the pusher. Fixing means are for selecting and fixing the position of the stopper on the pusher. An operating portion is provided in the stopper for performing a pressing operation, a traction operation or a pinching operation. The position of the stopper on the pusher can be regulated by releasing the fixation by the fixing means through an operation at the operating portion and the depth of insertion of the pusher into the outer tube is restricted by abutment of the stopper on a portion of the outer tube and in combination with the other elements or steps of the claim.

The independent claims also include other patentable subject matter in combination with the other elements or steps of the claim not mention in the above paragraph.

The examiner would also like to note that 112 6<sup>th</sup> paragraph is invoked with regards to the means plus function language.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
